Island Energy Customer Notice

California Senate Bill 57 (SB 57): Ratepayer and Technological Innovation Protection Act

California Senate Bill 57 is designed to protect customers from potential cost increases related to energy demand from large data centers. The law also requires utilities to submit annual reporting beginning January 1, 2027. SB 57 was signed into law on October 11, 2025.

Mare Island's Unique Energy Structure

As a redevelopment area of the former naval shipyard, Mare Island receives its own federal energy resource allocations and procures power directly from the market. These resources and contracts are overseen by the Pittsburg Power Company Board of Directors, ensuring Island Energy remains both operationally and financially independent.

Our Commitment to You

Island Energy is dedicated to providing safe, reliable, and responsive utility services at competitive prices for the Mare Island community. Serving you is our pride and our highest priority.
